

PHONGSATHORN JANJAMSAI

About Me

I'm a third year student of Engineering with a passion for diving into programming, Machine learning, Mobile application to develop our society. I'm a highly motivated, fast learner. I'm seeking internship opportunity as position as Machine learning engineer and full stack developer

095-195-7498

Phongsathornjanjamsai@gmail.com

live in Patomtani, I can work in Patomtani and Bangkok

Language

English

– good reading, writing,
listening and speaking

Programming Skills

- C
- Java
- Python
- Dart
- html/css
- JavaScript
- PHP
- SQL

Tools

- Git version control
- Flutter
- Bootstrap
- MATLAB
- MySQL
- Firebase

Past Project

2023

Part of Artificial intelligence class

Classification of Handwritten Digits using MATLAB dataset.

2023

Tomato leaf classification Part of Artificial intelligence class

Deep learning classification using MATLAB, selection tomato from tomato leaf picture, using 8000 photo for training. Can be divided in to 5 classes As follows 1. Yellow Leaf curl Virus 2. Early blight 3. Healthy 4. Late blight 5. Leaf Mold

2024

Province Clustering Part of Artificial intelligence class

This project is Clustering the province by tourist attraction (waterfall, island, cave, mountain, river, beach, hot spring)

2024

Vet clinic management Part of Software engineer class

This is a group project and I am the only one programmer in the group, I developed all of font-end and back-end by my own, This project has 2 parts: windows app and mobile app, and there are 4 roles: admin, doctor, manager, member. I made this project by using flutter and php api for query data from MySQL database

2024

ToDoList Part of Mobile and Cloud Computing class

This is a simple ToDoList application. I made this by using Firestore Database and Firebase Authentication

Education

King Mongkut's University of Technology North Bangkok

Bachelor of Electronic Engineering (Computer) G.P.A.X: 3.18
Major : Electronic Engineering (Computer)

2021 - present
